

Alfahobbies AlfaMill Y Axis Slide

The Y Axis Slide is the part that slides in and out on the Y Axis Bed. This part is made from a 1530 80/20 extrusion. 1530 stands for 1 ½ inches by 3 inches. Make this part 6 inches long and cut the ends square within plus or minus 1 degree. There are 2 holes in each end of this extrusion. All four should be tapped 5/16-18.
