

Alfahobbies AlfaMill
1/2-10 2 START ACME ROD
LEAD SCREWS
01/02/2011

These are the lead screws for the Alfamill. They are made from 1/2-10, 2 Start Fast-Travel Precision Acme Threaded Rod. This rod can be purchased from McMaster Carr online. McMaster carr's part number for this part is 98940A022 for 6 feet long and 98940A629 for 3 feet. These Lead screws are what the Antibacklash nuts are made to fit. When making these cut them to length and deburr the ends carefully. You want these to screw into the nuts without cutting into them and causing damage to the threads in the nuts. Take your time to do a nice job on the ends and they will work fine.
